You Wouldn't Want to be a Polar Explorer!

Presents information about the men who undertook Ernest Shackleton's expedition to Antarctica and the perils they faced along the way.

The Reverend W.S. Green, Explorer and Fishery Scientist

After the United States purchased the Louisiana Territory in 1803, the young nation needed brave pioneers to explore this vast uncharted land. Zebulon Pike, a young frontier soldier, welcomed the challenge. Heading southwest from St. Louis, Missouri, Pike led an expedition across rolling prairies before arriving at the towering mountains. Pike became the first American to explore the southern Rocky Mountains, recording detailed maps. The highest peak in the range, which he never reached himself, now bears his name, Pikes Peak. Authors William R. Sanford and Carl R. Green explore the life of this American trailblazer.

An account of the story of one of the most difficult adventures of all time across the bitterly cold continent of Antarctica. This book charts the events of the Endurance expedition and describes the ways in which Shackleton's polar team dealt with extreme cold, strong icy winds and the lack of food and water.

Planet Earth

Tristan Gooley, author of THE NATURAL NAVIGATOR demonstrates how it is possible to connect profoundly with the lands we travel through. In THE NATURAL EXPLORER he combines the work of some of the most insightful travellers of the past two thousand years with his own experience. From the author of How To Read Water, The Sunday Times Book Of The Year. The most rewarding travel experiences do not depend on our destination or the length of our journey, but on our levels of awareness. A short walk can compare with an epic journey, when we take the time to focus on the

things that dramatically enrich each journey. Exploration is no longer about hardship or long distances, it is about celebrating the sense of connection and discovery that is possible in all our travels.

The Natural Explorer

Biography written for boys.

The Explorer

"Captain James Cook is probably the most famous maritime explorer of all time, and with good reason. The three voyages of discovery he made between 1768 and his death in 1779 set new standards in navigation, surveying and shipboard health. Among his many achievements he dispelled the myth of a Great Southern Continent, established that New Zealand was two islands and discovered and charted the eastern coast of Australia to a high degree of accuracy. The retinues of gentleman scientists that sailed with him made advances in astronomy, botany and zoology, and artists such as Sydney Parkinson, Alexander Buchan, and William Hodges provided Europeans with some of the first images of the exotic peoples, flora and fauna of the Pacific." "Much has been written about Cook, but in this format the author, Anthony Cornish, is able to structure the book as a Question & Answer session, to discuss the 101 most pertinent and interesting questions relating to Cook's career and character, the objectives and route of each of his voyages, and the key events. Beautifully enhanced with engravings from the published narratives of the voyages, artefacts and paintings now held in the National Maritime Museum, Greenwich, and photographs of the Endeavor replica, this is an essential companion for any Cook enthusiast."--BOOK JACKET.
