Rabbits!

Do you know that Rabbits have almost a 360° vision? And do you know that every little habit of Rabbits can become a story to tell? It is sometimes difficult to make our children understand the beauty of nature, to make them appreciate the small things, the beauty of a flower, the freshness of the air, the

scent of grass. Many times we are not fortunate to be in contact with nature, far from a meadow, closed in the cities. Still, so often, while looking out from our balcony in a beautiful country house, we know how to observe but do not appreciate creation's beauty. Know the details and habits of a Rabbits as common as it is surprising, through a simple path, which fuels your child's interest and curiosity. That's the purpose of this book. But beware, prepare for the challenge! You will have to be able to answer the questions that your child will ask you by showing off their deep knowledge in the microworld of the Rabbits: -Mom, do you know what Rabbits eat? I do! -Hey dad, do you know how Rabbits sweat? I do! -Grandpa, do you know how many taste buds that Rabbit have? I do! -Grandma, do you know how many different types of Rabbits there are in the world? I do! -Sarah, you're my big sister, and you've studied a lot, but I bet you don't know how many teeth are in a Rabbits mouth! I know that. You don't need anything else; just one click on "Buy Now," and you will let your child live a magical new adventure with his new friend Rabbit and the magic natural world of small animals.

Unlearn Your Pain

The groundbreaking book that explains Sensory Processing Disorder (SPD)--and presents a drug-free approach that offers hope for parents--now revised and updated. Does your child exhibit... Over-responsivity--or under-responsivity--to touch or movement? A child with SPD may be a "sensory avoider," withdrawing from touch, refusing to wear certain clothing, avoiding active games--or he may be a "sensory disregarder," needing a jump start to get moving. Over-responsivity--or under-responsivity--to sounds, sights taste, or smell? She may cover her ears or eyes, be a picky eater, or seem oblivious to sensory cues. Cravings for sensation? The "sensory craver" never gets enough of certain sensations, e.g., messy play, spicy food, noisy action, and perpetual movement. Poor sensory discrimination? She may not sense the difference between objects or experiences--unaware of what she's holding unless she looks, and unable to sense when she's falling or how to catch herself. Unusually high or low activity level? The child may be constantly on the go--wearing out everyone around him--or move slowly and tire easily, showing little interest in the world. Problems with posture or motor coordination? He may slouch, move awkwardly, seem careless or accident-prone. These are often the first clues to Sensory Processing Disorder--a common but frequently misdiagnosed problem in which the central nervous system misinterprets messages from the senses. The Out-of-Sync Child offers comprehensive, clear information for parents and professionals--and a drug-free treatment approach for children. This revised edition includes new sections on vision and hearing, picky eaters, and disorders such as autism, among other topics.

The Out-of-Sync Child

This book is a collection of short stories written by Frank Clark. Stories are humorous, imaginative, and introspective. An interesting and creative style of writing outside the box of the classical literary short story. Many stories are written in the vernacular to describe people and place. These stories are about everyday people in everyday life. You will identify with many of the characters and themes of these stories. The wit and creativity of Frank's writing will make you laugh, allow you to step into an imaginary world and will give you something to think about. Each story is amusing and will capture your interest. Read one story and you can't wait to read the next. These stories are quite funny. You will laugh and you will smile. Enter an imaginary world, a brief escape from the demands of your day. You will return to your day feeling refreshed, relaxed with exuberant energy to complete your day. Maybe an extraordinary day. Lastly, many of the stories are introspective. They give you something to think about from a different point of view. These stories have been written for you. You will find them a delightful read. Enjoy your read.

Fans of adventure, romance, and a strong heroine will love this this action-packed historical trilogy by three-time Newbery Honor winner and New York Times bestselling author Jennifer L. Holm. 1855. The unknown wilds of the Pacific Northwest—a land not yet tamed, and certainly not fitting for a proper young lady! Yet that's just where Miss Jane Peck finds herself. After a tumultuous childhood on the wrong side of Philadelphia high society, Jane is trying to put aside her reckless ways and be accepted as a proper young lady. And so when handsome William Baldt proposes, she joyfully accepts and prepares to join him in a world away from her home in Washington Territory. But Miss Hepplewhite's

straitlaced finishing school was hardly preparation for the treacherous months at sea it takes to get there, the haunting loss she'll face on the way, or the colorful characters and crude life that await her on the frontier.

What's it like to start a revolution? How do you build the biggest tech company in the world? And why do you walk away from it all? Paul Allen co-founded Microsoft. Together he and Bill Gates turned an idea writing software into a company and then an entire industry. This is the story of how it came about: two young mavericks who turned technology on its head; the bitter battles as each tried to stamp his vision on the future; and, the ruthless brilliance and fierce commitment. And finally, Allen's extraordinary step in walking away from it all to discover what it is you do after you've already changed the world.

Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

Out Of Control

Annawadi is a slum at the edge of Mumbai Airport, in the shadow of shining new luxury hotels. Its residents are garbage recyclers and construction workers, economic migrants, all of them living in the hope that a small part of India's booming future will eventually be theirs. But when a crime rocks the slum community and global recession and terrorism shocks the city, tensions over religion, caste, sex, power, and economic envy begin to turn brutal. As Boo gets to know those who dwell at Mumbai's margins, she evokes an extraordinarily vivid and vigorous group of individuals flourishing against the odds amid the complications, corruptions and gross inequalities of the new India.

Behind the Beautiful Forevers

Dive into Systems is a vivid introduction to computer organization, architecture, and operating systems that is already being used as a classroom textbook at more than 25 universities. This textbook is a crash course in the major hardware and software components of a modern computer system. Designed for use in a wide range of introductory-level computer science classes, it guides readers through the vertical slice of a computer so they can develop an understanding of the machine at various layers of abstraction. Early chapters begin with the basics of the C programming language often used in systems programming. Other topics explore the architecture of modern computers, the inner workings of operating systems, and the assembly languages that translate human-readable instructions into a binary representation that the computer understands. Later chapters explain how to optimize code for various architectures, how to implement parallel computing with shared memory, and how memory management works in multi-core CPUs. Accessible and easy to follow, the book uses images and hands-on exercise to break down complicated topics, including code examples that can be modified and executed.
