Intro

INTRODUCTION

SUSTAINABLE TOURISM AND PRINCIPLES

The concept of sustainable development is based on four basic principles

The development of vital ecological processes, improves by providing the protection to be compatible with biodiversity and biological resources

performs an effective spending with financial resources to be managed in a way that they can use for future generations.

Continuous improvement in sustainable tourism, economic cooperation is based on the balance between environmental and social values

Evolution of Sustainable Tourism Development

It promises for saving characteristic assets to the following eras while averting extreme ecological contamination.

While the Earth Charter was a declaration of fundamental values and principles for sustainability Agenda 21 was illustrated as an Action Plan for the usage of the Sustainable improvement standards.

Monetary development, social advance and natural security.

To keep up and strengthen the quality of life of local citizens, also the social structures and access to resources, amenities and life support systems

To encourage the preservation of ecological areas, natural surroundings and untamed life, and limit harm to them.

To limit the utilization of rare and non-inexhaustible resources in the advancement and operation of tourism facilities and services.

To limit the contamination of water, land and air and the solid waste generated by tourism organizations and tourists.

Dimensions of Sustainable Tourism

Principles of Sustainable Tourism Development

It can accommodate today's hosts and visitors while securing and improving a similar opportunities for the future

Pre requisites to Sustainable Tourism Development

Key Strategies for Sustainable Tourism Development

Regular Environmental Impact Assessment and application of remedial measures

Local people benefits from sustainable tourism practices through economic development, creation of job opportunities and development of local infrastructure such as roads, hotels, airports

Taxes should enact to reduce environment degradation

Checking out the deviations in the implementation and outcomes of the project and taking corrective measures if required.

SUMMARY

Government organizations, tourism industry, tourists, pressure groups, voluntary sector, experts and the media industry.

It is an approach which includes working for the long haul feasibility and nature of both characteristic and human resource.
