Radar Instruction Manual

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques

for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Twelve Years a Slave

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Manual for Spiritual Warfare

A fierce war rages for your soul. Are you ready for battle? Like it or not, you are at war. You face a powerful enemy out to destroy you. You live on the battlefield, so you can't escape the conflict. It's a spiritual war with crucial consequences in your everyday life and its outcome will determine your eternal destiny. You must engage the Enemy. And as you fight, you need a Manual for Spiritual Warfare. This guide for spiritual warriors will help you recognize, resist, and overcome the Devil's attacks. Part One, "Preparing for Battle," answers these critical questions: • Who is Satan, and what powers does he have? • What are his typical strategies? • Who fights him alongside us in battle? • What spiritual weapons and armor do we possess? • How do we keep the Enemy out of our camp? Part Two, "Aids in Battle," provides you these essential resources: • Teaching about spiritual warfare from Scripture and Church documents • Scripture verses for battle • Wisdom and inspiration from saints who fought Satan • Prayers for protection, deliverance, and victory • Rosary meditations, hymns, and other devotions for spiritual combat St. Paul urges us to "fight the good fight of the faith" (1 Tim 6:12). Take this Manual for Spiritual Warfare with you into battle. The beautiful Premium UltraSoft gift edition features sewn binding, ribbon marker and silver edges.

Buyology

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Personality

[This] introductory textbook examines theories of personality, starting from the viewpoint that there are eight basic aspects to personality: psychoanalytic, ego, biological, behaviorist, cognitive, trait, humanistic, and interactionist. Later chapters apply these aspects to individual differences such as those of gender and culture. Summaries after each chapter encapsulate key theorists and concepts discussed. -<http://www.bn.com>.

Computer-Related Risks

"This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future." —Ralph Nader, Consumer Advocate This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages of telephone systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks). Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. Computer-Related Risks: Presents comprehensive coverage of many different types of risks Provides an essential system-oriented perspective Shows how technology can affect your life—whether you like it or not!

Insanely Simple

'Simple can be harder than complex. You have to work hard to get your thinking clean to make it simple. But it's worth it in the end, because once you get there, you can move mountains' Steve Jobs, BusinessWeek, May 25, 1998 To Steve Jobs, Simplicity wasn't just a design principle. It was a religion and a weapon. The obsession with Simplicity is what separates Apple from other technology companies. It's what helped Apple recover from near death in 1997 to become the most valuable company on Earth in 2011, and guides the way Apple is organized, how it designs products, and how it connects with customers. It's by crushing the forces of Complexity that the company remains on its stellar trajectory. As creative director, Ken Segall played a key role in Apple's resurrection, helping to create such critical campaigns as 'Think Different' and naming the iMac. Insanely Simple is his insider's view of Jobs' world. It reveals the ten elements of Simplicity that have driven Apple's success - which you can use to propel your own organisation. Reading Insanely Simple, you'll be a fly on the wall inside a conference room with Steve Jobs, and on the receiving end of his midnight phone calls. You'll understand how his obsession with Simplicity helped Apple perform better and faster.

Bone Detective:

Diane France loves bones. Why? Because they talk to her. Every skeleton she meets whispers secrets about the life-and death-of its owner. Diane France can hear those secrets because she's a forensic anthropologist, a bone detective. She has the science skills and know-how to examine bones for clues to a mystery: Who was this person and how did he or she die? Bones tell Diane about the life and times of famous people in history, from a Russian royal family to American outlaws and war heroes. They speak to her about murders, mass disasters, and fatal accidents. One day she's collecting skeletal evidence at a crime scene. A phone call later she's jetting to the site of a plane crash or other unexpected tragedy to identify victims. Young readers will be captivated by the thrilling real-life story of this small-town girl full of curiosity and mischief who became a world-famous bone detective.

Accelerando

His most ambitious novel to date, ACCELERANDO is a multi-generational saga following a brilliant clan of 21st-century posthumans. The year is some time between 2010 and 2015. The recession has ended, but populations are ageing and the rate of tech change is accelerating dizzyingly. Manfred makes his living from spreading ideas around, putting people in touch with one another and leaving a spray of technologies in his wake. He lives at the cutting edge of intelligence amplification technology, but even Manfred can take on too much. And when his pet robot cat picks up some interesting information from the SETI data, his world - and the world of his descendants - is turned on its head.

Sailing Made Easy

Sailing Made Easy is the first step in a voyage that will last you the rest of your life. It is a gift from a group of dedicated sailing professionals who have committed their lives to sharing their art, their skill, and their passion for this wonderful activity. This book, which Sailing Magazine called "best in class" upon its release in 2010, is the most comprehensive education and boating safety learn-to-sail guide to date. It is also the official textbook for the ASA Basic Keelboat Standard (ASA 101). Incorporated in the textbook are useful illustrations and exceptional photographs of complex sailing concepts. The text's most distinguishing feature is its user friendly "spreads" in which instructional topics are self-contained on opposing pages throughout the book. There are also chapter end quizzes and a glossary to help those new to sailing to navigate their way through the extensive nautical terminology.

Introduction to Laser Technology

The only introductory text on the market today that explains the underlying physics and engineering applicable to all lasers Although lasers are becoming increasingly important in our high-tech environment, many of the technicians and engineers who install, operate, and maintain them have had

little, if any, formal training in the field of electro-optics. This can result in less efficient usage of these important tools. Introduction to Laser Technology, Fourth Edition provides readers with a good understanding of what a laser is and what it can and cannot do. The book explains what types of laser to use for different purposes and how a laser can be modified to improve its performance in a given application. With a unique combination of clarity and technical depth, the book explains the characteristics and important applications of commercial lasers worldwide and discusses light and optics, the fundamental elements of lasers, and laser modification. In addition to new chapter-end problems, the Fourth Edition includes new and expanded chapter material on: Material and wavelength Diode Laser Arrays Quantum-cascade lasers Fiber lasers Thin-disk and slab lasers Ultrafast fiber lasers Raman lasers Quasi-phase matching Optically pumped semiconductor lasers Introduction to Laser Technology, Fourth Edition is an excellent book for students, technicians, engineers, and other professionals seeking a fuller, more formal introduction to the field of laser technology.

Alone

This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Birth of the Cool

Mudenstein, a monster truck, loves life in the arena where his tall tires grab the dirt, he crushes cars, and he takes on a fire-breathing crane.

I'm a Monster Truck

Britain, in the mid 21st century. A new prime minister, Lev Solokov is elected. In spite of his Russian surname, he is the charismatic politician who, on the surface, appears to be just what Britain needs. But he's not what Gavin needs. Gavin is a Pustoy, a human who, among countless others, Solokov's researchers has declared a soulless, subhuman race. Solokov joins a dark lineage of genocidal tyrants that have gone before him. In synthesizing his own race to persecute others, perhaps he has succeeded in a horror more insidious than any of his forebears, especially as he appears to have done so with both overwhelming public blessing and encouragement. Or at least he would have, if not for the increasing din of the Pustoy protesting outside his offices. Chosen at random owing to his position as a forefront campaigner for the rights of the Pustoy, Gavin is framed for a crime he didn't commit and is forced to go on the run, and so Solokov in one fell swoop kills any budding sympathy the people may have had for the Pustoy, and would appear to have silenced one of his loudest protestors. Just who are the Pustoy of this world? The persecutors or the persecuted? Will Gavin remain a hunted scapegoat? Is Solokov acting for the greater good; are the Pustoy really devoid of a soul? More importantly, how far away is this future, really? Phillipe Blenkiron's conceptual poetry collection demands these questions of the reader, whilst offering an unflinching examination of the human psyche, exploring the clouded moral hues between black and white, between right and wrong, that exist inside all of us. For fans of "1984," "Brave New World," and other greats of dystopian fiction, Philippe Blenkiron's debut poetry collection is shocking, unsettling, and closer to real-life than we dare admit...

Jane Yolen, the bestselling and award-winning author of *The Devil's Arithmetic*, returns to World War II and the Holocaust with this timely and necessary novel. It's 1942 in Poland, and the world is coming to pieces. At least that's how it seems to Chaim and Gittel, twins whose lives feel like a fairy tale torn apart, with evil witches, forbidden forests, and dangerous ovens looming on the horizon. But in all darkness there is light, and the twins find it through Chaim's poetry and the love they have for each other. Like the bright flame of a Yahrzeit candle, his words become a beacon of memory so that the children and grandchildren of survivors will never forget the atrocities that happened during the Holocaust. Filled with brutality and despair, this is also a story of poetry and strength, in which a brother and sister lose everything but each other. Nearly thirty years after the publication of her award-winning and bestselling *The Devil's Arithmetic* and *Briar Rose*, Yolen once again returns to World War II and captivates her readers with the authenticity and power of her words. Perfect for fans of Markus Zusak's *The Book Thief* and Ruta Sepetys's *Salt to the Sea*.

The Pustoy

A child's guide through grief that is formed by the truths of our Catholic faith and by what bereavement professionals have found helpful. This book helps children ages 7 to 12 understand death, funeral rituals, the grieving process, and what to expect during the first year after the loss of a loved one. Schuler gives reassuring voice to a child's feelings of loss, and provides a safe space where hopes can be expressed and memories can be treasured.
