Connecting Common Core Literacy Learning Standards to effective strategies and creative activities, the book includes authentic literacy assessments and formal evaluations to support reading teaching in the elementary classroom. Written by reading practitioners and researchers, this book is a must-have for novices as well as for veteran classroom teachers who want to stay on top of changing literacy trends.

A Close Look at Close Reading

The Common Core State Standards have put close reading in the spotlight as never before. While middle and high school teachers want and need students to connect with, analyze, and learn from both literary and informational texts, many are unsure how to foster the skills students must have in order to develop deep and nuanced understanding of complicated content. Is there a process to follow? How is close reading different from shared reading and other common literacy practices? How do you prepare students to have their ability to analyze complex texts measured by high-stakes assessments? And how do you fit close reading instruction and experiences into an already crowded curriculum? Literacy experts Barbara Moss, Diane Lapp, Maria Grant, and Kelly Johnson answer these questions and more as they explain how to teach middle and high school students to be close readers, how to make close reading a habit of practice across the content areas, and why doing so will build content knowledge. Informed by the authors' extensive field experience and enriched by dozens of real-life scenarios and downloadable tools and templates, this book explores • Text complexity and how to determine if a particular text is right for your learning purposes and your students. • The process and purpose of close reading, with an emphasis on its role in developing the 21st century thinking, speaking, and writing skills essential for academic communication and college and career readiness. • How to plan, teach, and manage close reading sessions across the academic disciplines, including the kinds of questions to ask, texts to use, and supports to provide. • How to assess close reading and help all students—regardless of linguistic, cultural, or academic background—connect deeply with what they read and derive meaning from complex texts. Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers—and empowered and independent learners. In this comprehensive resource, you'll find everything you need to start their journey.

Reading to the Core

Close, critical, and generative reading can be broken down into five key questions that a strategic reader must answer: What does the text say? How does the author say it? What does the text mean? What does it mean to me? What insights can I now gain? In this resource, the authors show that insight into these questions is the key to comprehending text. The authors provide tools such as mining charts, assessments, progress monitoring charts, and rubrics to strengthen the teaching and use of strategies

including guided highlighted reading for craft, finding the element of argument in text, reading multiple texts for theme, and evaluating visual text. A culminating chapter provides a blueprint for creating a literacy action plan for classroom, school, and district that highlights students' growth and documents teacher effectiveness.

Common Core CPR

The ideal? Newly minted high school graduates all across the nation, each one a complex text genius, a writer and analytic thinker beyond compare. All on to glorious colleges and careers, thanks to the Common Core. The reality? The 1.3 million students who fail to graduate from high school each year and the hundreds of thousands more who either gave up or lost interest long ago . . . The reality is why Common Core CPR is needed. Urgently. Because if we continue to insist that all students meet expectations that are well beyond their abilities and mindsets, these kids will only decline faster. We must be brave enough-and trained enough-to cast aside what we know harms students and apply with renewed vigor the teaching methods we know work. Releah Lent and Barry Gilmore rise to the challenge, and there are no two authors better equipped to do so. They embrace what is best about the standards-their emphasis on active, authentic learning-and then explicitly show teachers how to connect these ideal outcomes to practical classroom strategies, detailing the day-to-day teaching that can coax reluctant learners into engagement and achievement. You'll learn how to: Consider choice and relevance in every assignment Plan and spot opportunities for success Scaffold students' comprehension of complex fiction and nonfiction texts Model close reading through thoughtful questioning Teach students to use evidence in reading, writing, speaking, and reflection . . . And so much more It's not the big sweeping formulas for achievement that will win the day; it's the incremental growth that teachers need to make happen: that one book, that one writing assignment, to help a student turn a corner. "If we can get that one transformational moment to occur, and follow it up by designing more opportunities for success, that's the ideal," say Lent and Gilmore.

Big Skills for the Common Core

Zoom in on the academic skills students are required to learn in reading, writing, speaking/listening, and language! This book cuts through all of the Common Core jargon and gets right to the heart of what students need to learn now. Big Skills for the Common Core is packed with engaging strategies you can use immediately to improve your students' literacy skills and help them retain those skills. Special features include... Charts that break down the skills for each anchor standard and put them into teacher- friendly language. BONUS! The charts highlight the big shifts for teachers for discussion and sharing. Practical strategies to help students tackle and understand complex texts. Helpful ideas for teaching argument writing, plus writing rubrics and assessment strategies. Clear information on Tier II and Tier III words and how to teach them. In addition, each section of the book ends with "Classroom Close-Ups," which take you inside real classrooms that are implementing the Common Core. You'll see the standards in action across the curriculum and get takeaway tips you can use tomorrow in your own classroom!

Create, Compose, Connect!

Find out how to incorporate digital tools into your English language arts class to improve students' reading, writing, listening, and speaking skills. Authors Jeremy Hyler and Troy Hicks show you that technology is not just about making a lesson engaging; it's about helping students become effective creators and consumers of information in today's fast-paced world. You'll learn how to use mobile technologies to teach narrative, informational, and argument writing as well as visual literacy and multimodal research. Each chapter is filled with exciting lesson plans and tech tool suggestions that you can take back to your own classroom immediately. See Jeremy Hyler's TEDx! <https://www.youtube.com/watch?v=WHtXIJvS-SAA>

Inquiry Paths to Literacy Learning

Inquiry Paths to Literacy Learning, a collection of chapters from secondary teachers and university researchers, offers English language arts teachers several models and considerations for how to design and implement inquiry-based teaching and learning. As the contributors demonstrate, an inquiry approach can significantly boost student achievement, understanding, and transfer of learning. The chapters in this collection present classroom-tested approaches, activities, and assignments that teachers can use right away, but that also serve as models for designing learning experiences

that most engage and benefit learners. Focusing on issues that adolescents find consequential, the sample learning activities promote the development of complex literacy skills, engage students in evidence-based reasoning, and foster an environment of cooperation, collaboration, and respect for different points of view. Together, the contributions in this book envision the English language arts classroom as a supportive environment for authentic inquiry and for the genuine democratic processes involved in grappling together with tough perennial and contemporary issues.

The Better Writing Breakthrough

Every teacher knows the challenge of trying to engage reluctant readers and struggling writers--students whose typical response to a writing prompt is a few sentence fragments scribbled on a sheet of paper followed by an elaborate shrug of the shoulders. The best way to engage less confident readers and writers is to give them something powerful to think about. The Discourse and Writing Cycle explores writing as a means to focus student thinking, fuel deeper learning, and build complex understanding in English, social studies, math, and science. This field-tested approach from well-respected experts Eleanor Dougherty, Laura Billings, and Terry Roberts is designed for use in grades 4-12. The book explores the three interrelated sequences of the cycle--the Discourse Sequence, the Transition to Writing Sequence, and the Writing Sequence--and includes classroom examples and sample lesson plans from across the content areas. The cycle will inspire you as a teacher and help you to inspire your students to write with confidence and competence. "How often we dim or extinguish the creative sparks that can come from good writing! William Butler Yeats proclaimed that 'Education is not the filling of a pail, but the lighting of a fire.' This book lights the fire for the teaching of writing." --John Hattie, author of the Visible Learning books

Using Rubrics to Improve Student Writing, Grade 5

This is one in a series of handy grade-level guides providing concrete suggestions for formative assessment to foster improved student learning. Complete with extensive student samples, each book offers ideas for supporting learners as they write across genres.

The Hitchhiker's Guide to Writing Research

This book brings together the work of established scholars from around the world to celebrate and honor the many ways in which Steve Graham has contributed to the advancement of teaching and researching writing. Focusing on writing development and writing instruction in different contexts of education, original contributions in this book critically engage with theoretical and empirical issues raised in Steve Graham's influential body of work and significantly extend our understandings of the importance of writing in developing learners' literacy and the roles of writing in teaching and learning processes. This book is organized around themes central to Steve Graham's work, including theories and models of writing, effective instructional methods in teaching writing, surveys on teaching and learning writing, and systematic review studies on writing. Apart from regular chapters, the book also features personal and scholarly reflections revealing the powerful ways in which Steve Graham's work has influenced our thinking in the field of writing research and continues to open up new avenues for future research endeavors.
