The Tree That Could Be Green

"The Tree That Could Be Green" is a Children's Picture Book dedicated to the empowerment of the child in all of us. The purpose of this book is to educate children and parents on the serious changes taking place on our planet. Through the two main characters, a sickly Mr. Tree and a young lady named Carmen we learn that we can all help and make a difference. Please do whatever you can to make your own difference on this planet!

The People Versus the Tree

This is the story of a man brought up on a Connecticut farm who decided to specialize in environmental law. While attending college and law school, he worked for a tree surgery firm and learned all he could about physiology, anatomy, pathology, and the survival and reproductive strategies of trees. He particularly enjoyed visiting a botanical garden for trees near his school and read as much about trees as he did about law. After graduating, he was lucky enough to join a firm in White Plains, New York, where he worked on numerous cases involving environmental issues that included trees. Yearning to do more, however, he founded a nonprofit organization and made it his mission to protect trees: His first case involved Mr. Elm, a majestic elm tree in the Town of Carpen. Mr. Grevis, the landowner, wanted to chop down the tree because of its falling leaves and sap droppings. But the lawyer refused to back down, taking him to court to save Mr. Elm. The stakes are high in this courtroom drama, and the final decision rests with the jury in The People Versus the Tree.

Captain Green and the Tree Machine

The Plough, the Loom, and the Anvil

The school of thought surrounding the urban ecosystem has increasingly become in vogue among researchers worldwide. Since half of the world's population lives in cities, urban ecosystem services have become essential to human health and wellbeing. Rapid urban growth has forced sustainable urban developers to rethink important steps by updating and, to some degree, recreating the human–ecosystem service linkage. Assessing, as well as estimating the losses of ecosystem services can denote the essential effects of urbanization and increasingly indicate where cities fall short. This book contains 13 thoroughly refereed contributions published within the Special Issue “Urban Ecosystem Services”. The book addresses topics such as nature-based solutions, green space planning, green infrastructure, rain gardens, climate change, and more. The contributions highlight new findings for landscape architects, urban planners, and policymakers. Important future cities research is considered by looking at the system connectivity between the social and ecological sphere—via varying forms of urban planning, management, and governance. The book is supported by methods and models that utilize an urban sustainability and ecosystem service-centric focus by adding knowledge-base and real-world solutions into the urbanization phenomenon.

Public Opinion

Marking the 800th anniversary of the Forest Charter, award-winning botanical artist Christina Hart-Davies celebrates our long relationship with trees. Since pre-historic times they have provided us with shelter, fuel, medicine, food and even the air we breathe. They have tanned leather, dyed cloth and made everything from cathedrals to clothes-pegs. We have told stories about them, admired their magnificent beauty and woven them into our spiritual lives. Following *A Wild Plant Year*, which recorded the folklore and cultural history of our native wildflowers, in *The Greenwood Trees* Christina looks at the history, folklore and virtues of our native trees - and a few well-known introductions too - all illustrated with her exquisitely detailed watercolour paintings. We have relied on trees throughout our history. We still do, and we always will. Touch wood. - Which tree provides a talisman supposed to protect against lightning? - Which firewood burns best, even when green? - Which tree should you plant by the dairy and the privy to deter flies?

The Green Man Tree Oracle and Plaque

Beginning on the 1st December and journeying through to Christmas Day, this book is packed with inspirational thoughts and creative ideas to bring real meaning to your Christmas experience. There are nine different 'times' included for each day from which participants can mix and match depending on available time and resources. Suitable for individuals, couples, families or flatmates, the book is designed to bring something fresh and new each time you use it over the years. The different 'times' include: Bible Time, Question Time, Reflection Time, Discussion Time, Activity Time, Decoration Time, Study Time, Response Time and Prayer Time. Instructions are also included to make your own set of 25 stockings. You can choose from either the 'No-Sew' or 'Simple Sew' examples. Fill your stockings with small treats and, as you share the treats each day, use the devotional resource to enhance your understanding and engagement with the Christmas season.

Urban Ecosystem Services

If trees could talk, they would remind us that the Creator made humans with His hands on the sixth day and intended us to be the caretakers of all other creations. We are born and wake up one day to find ourselves here, with everything already in place. The trees are great, and so are we but they can and did live without us, while we cannot live without them. In this collection of prose and poetry, author Ruth M. Glass celebrates trees and explores what they might have to say to humanity if they were able to speak to us. They furnish us with so much beauty, charm, and creativity. Glass believes trees would encourage us to respect the Almighty Creator and praise Him for the splendor and usefulness that trees bring into our lives. Beautiful Trees Who can call all the trees by name, See their beauty as one and the same. Trees have families character and traits, Like people they give, and also have fate. There are so many trees - shapes, sizes and heights, Thin, thick, course and smooth bark, that covers them right. Their leaves and their needles drape them over with care. Their lovely color, their fragrance of flowers And fruits that they bear. To man, trees are awesome, a magnificent scene. The trees can capture mans very being. We are happy to be beautiful trees. God made us and man is pleased.

The Green Man Tree Oracle

Pemba and the Little Green Tree is a touching story of boy who learns the importance of taking care of the environment where he lives. The story takes place in Nepal along the steep mountain slopes. After years of cutting trees for firewood, his home is in great danger when monsoon rains hit the barren hillsides and landslides destroy the villages below. As Pemba travels through the hills above his stone house, he learns from his wise grandfather what happened to cause the deadly landslides. After he meets the man who looks over the forest, Pemba beams with hope and pride, knowing he can make things better. The books vivid illustrations connect you with Pemba and his grandfather and bring you to the rugged Nepal hills. The story teaches a lesson on environmental stewardship and sustainability. It is a lesson a young person can apply to the many environmental challenges facing humankind in todays world.

The Greenwood Trees

Millions of creatures live in the backyard: beetles and bugs; butterflies and birds; turtles and toads; ants, earthworms, and tiny animals hidden in the grass or deep in the soil. These creatures lead busy lives, climbing trees, crawling over rocks, searching for food, and building nests. With this book's 46 pages of illustrations — each accompanied by fact-filled captions — kids can combine the fun of coloring with the fascination of discovering how all kinds of living creatures are linked together. Realistic pictures to color depict the backyard through all four seasons and during the day and night. The captions identify different types of trees, flowers, and bushes; butterflies, moths, and birds; reptiles and amphibians; and many other plants and animals. Suitable for ages 8-11, this informative coloring book recaptures the excitement of the natural world that's right outside the back door.

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Johnny Appleseed

Excerpt from Johnny Appleseed: The Romance of the Sower Three-quarters of a century ago he was still a loved and revered guest in the cabins of our grandfathers. His ar chards lived after him. Some of his trees may be standing today; but the man who planted them has receded to a dim, legendary figure. Let us recover what may be known of him, restore him to his time and place, recall the al most incredible conditions under which he did his ih spired task. Let us give him again his meed of love and gratitude for a beautiful life of self-sacrifice that asked no reward, and that came, in old age, to some end ob scure and lonely. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Johnny Appleseed: The Romance of the Sower

"Finally, the cliché is peeled away and the essence of this utterly American character is so revealing. John Chapman comes alive here and it is a thrilling experience to escape the specific gravity of the decades of myth" (Ken Burns). This portrait of Johnny Appleseed restores the flesh-and-blood man beneath the many myths. It captures the boldness of an iconic American and the sadness of his last years, as the frontier marched past him, ever westward. And it shows how death liberated the legend and made of Johnny a barometer of the nation's feelings about its own heroic past and the supposed Eden it once had been. Howard Means does for America's inner frontier what Stephen Ambrose's *Undaunted Courage* did for its western one.

This comprehensive bibliography includes books written about or set in Appalachia from the 18th century to the present. Titles represent the entire region as defined by the Appalachian Regional Commission, including portions of 13 states stretching from southern New York to northern Mississippi. The bibliography is arranged in alphabetical order by author, and each title is accompanied by an annotation, most of which include composite reviews and critical analyses of the work. All classic genres of children's literature are represented.

Johnny Appleseed

Empire of Vines traces the development of wine culture as grape growing expanded from New York to the Midwest before gaining ascendancy in California—a progression that illustrates viticulture's centrality to the nineteenth-century American projects of national expansion and the formation of a national culture.

The Age Revolution

Combat the effects of ageing and live a fuller, healthier life. Getting older may be inevitable, but your body doesn't have to show the signs of age. This revolutionary health book from bestselling author Dr Charles Clark, reveals how you can slow - or even reverse - the process of ageing. Using medically proven techniques for programming your body to work for you, rather than against you, he neutralises every age-related health concern. Improve your health and reduce requirement for medication Lower cholesterol and blood pressure Protect yourself from arthritis, cardiovascular disease and heart disease Control or reverse diabetes Look younger, prevent premature ageing and feel energised

Healthy lives, healthy people

The Government recognises that many lifestyle-driven health problems are at alarming levels: obesity; high rates of sexually transmitted infections; a relatively large population of drug users; rising levels of harm from alcohol; 80,000 deaths a year from smoking; poor mental health; health inequalities between rich and poor. This white paper outlines the Government's proposals to protect the population from serious health threats; help people live longer, healthier and more fulfilling lives; and improve the health of the poorest. It aims to empower individuals to make healthy choices and give communities and local government the freedom, responsibility and funding to innovate and develop ways of improving public health in their area. The paper responds to Sir Michael Marmot's strategic review of health inequalities in England post 2010 - "Fair society, healthy lives" (available at <http://www.marmotreview.org/AssetLibrary/pdfs/Reports/FairSocietyHealthyLives.pdf>) and adopts its life course framework for tackling the wider social determinants of health. A new dedicated public health service - Public Health England - will be created to ensure excellence, expertise and responsiveness, particularly on health protection where a national response is vital. The paper gives a timetable showing how the proposals will be implemented and an annex sets out a vision of the role of the Director of Public Health. The Department is also publishing a fuller story on the health of England in "Our health and well-being today" (http://www.dh.gov.uk/prod_consum_dh/groups/dh_digitalassets/@dh/@en/@ps/documents/digitalasset/dh_122238.pdf), detailing the challenges and opportunities, and in 2011 will issue documents on major public health issues.

The Moment of Lift

'We need this message more than ever' – Malala Yousafzai Hard-hitting and uplifting true stories of the women around the world facing extreme gender inequality who, when the wider community supports them to challenge the status quo, improve life for the whole of society. A Sunday Times bestselling debut from Melinda Gates, *The Moment of Lift* is a timely and necessary call to action for women's empowerment. The right to: Spend your own money. Go to school. Earn an income. Access contraceptives. Work outside the home. Walk outside the home. Choose whom to marry. Get a loan. Start a business. Own property. Divorce a husband. See a doctor. Drive a car. All of these rights are denied to women in some parts of the world. 'How can we summon a moment of lift for human beings – and especially for women? Because when you lift up women, you lift up humanity.' In this moving and compelling book, Melinda shares the stories of the inspiring people she's met during her work and travels around the world and the lessons she's learned from them. As she writes in the introduction, "That is why I had to write this book – to share the stories of people who have given focus and urgency to my life. I want all of us to see ways we can lift women up where we live." Melinda's unforgettable narrative is backed by startling data as she presents the issues that most need our attention – from child marriage to lack of access to contraceptives to gender inequity in the workplace. And, for the first

time, she writes about her personal life and the road to equality in her own marriage. Throughout, she shows how there has never been more opportunity to change the world – and ourselves. When we lift others up, they lift us up, too.

Get Fit, Get Happy

Get Fit, Get Happy isn't about just transforming the way you look. It's about transforming the way you feel. Harry Judd is a member of the hugely successful bands McFly and McBusted who have headlined Hyde Park, notched up 19 hit singles - of which 7 went to number one - and 2 number-one albums. He is a much-loved former Strictly Come Dancing champion and has been crowned the nation's favourite ever winner of the show. And yet in spite of this success, there have been times when Harry has been prone to anxiety and other mental health issues. He's not alone. Today, anxiety, depression and other mental health problems affect more of us than ever before and we are all looking for ways to adapt, cope and survive the pressures of daily life. The one thing that Harry has turned to time and time again to redress the balance in his life is fitness. Now, using a combination of exercise and dance, Harry makes the mood-boosting benefits of fitness accessible for everyone. Young or old, male or female, small or large, tall, short, thin, fat or somewhere in the middle: anyone will be inspired by Get Fit, Get Happy. Without any need for expensive kit or lots of time, Harry's approach is fun, fast, free. Part memoir in which Harry tells the life lessons that he has learned, and part richly researched fitness plan to get you feeling more positive, Get Fit, Get Happy is a fitness revolution to help people find a little more happiness in their lives.

Fair Society, Healthy Lives

How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, Rewire Your Brain will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

A leading expert on drug use illuminates the factors that permit some people to use such highly addictive and dangerous substances as alcohol, marijuana, psychedelics, and opiates in a controlled fashion. This cogently written work should be of interest to members of the medical community, particularly those who have contact with substance abusers, psychiatrists, sociologists, policymakers, administrators, and interested laypersons...Well worth reading. -- JAMA

Drug, Set, and Setting

Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young

adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

The Barbell Prescription: Strength Training for Life After 40 directly addresses the most pervasive problem faced by aging humans: the loss of physical strength and all its associated problems - the loss of muscle mass, bone mineral loss and osteoporosis, hip fractures (a terminal event for many older people), loss of balance and coordination, diabetes, heart disease related to a sedentary lifestyle, and the loss of independence. The worst advice an older person ever gets is, Take it easy. Easy makes you soft, and soft makes you dead. The Barbell Prescription maps an escape from the usual fate of older adults: a logical, programmed approach to the hard work necessary to win at the extreme sport of Aging Well. Unlike all other books on the subject of exercise for seniors, The Barbell Prescription challenges the motivated Athlete of Aging with a no-nonsense training approach to strength and health - and demonstrates that everybody can become significantly stronger using the most effective tools ever developed for the job.

The Long Life Plan

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

In Place of Fear

In this book, an international team of authors have sought to understand how five countries have made progress towards the ultimate goal of Good health at low cost in recent decades (and what happened to others that were viewed as successes 25 years ago). They take a holistic approach, demonstrating the strengths of collaboration across disciplines and continents. In doing so, they provide important lessons for other countries seeking to emulate success.

#1 NEW YORK TIMES BESTSELLER More than ONE MILLION copies sold A TODAY Show Read with Jenna Book Club Pick A New York Times Notable Book, and Chosen by Oprah Daily, Time, NPR, The Washington Post, Bill Gates and Barack Obama as a Best Book of the Year “Wise and wildly entertaining . . . permeated with light, wit, youth.” —The New York Times Book Review “A classic that we will read for years to come.” —Jenna Bush Hager, Read with Jenna book club “Fantastic. Set in 1954, Towles uses the story of two brothers to show that our personal journeys are never as linear or predictable as we might hope.” —Bill Gates “A real joyride . . . elegantly constructed and compulsively readable.” —NPR The bestselling author of *A Gentleman in Moscow* and *Rules of Civility* and master of absorbing, sophisticated fiction returns with a stylish and propulsive novel set in 1950s America In June, 1954, eighteen-year-old Emmett Watson is driven home to Nebraska by the warden of the juvenile work farm where he has just served fifteen months for involuntary manslaughter. His mother long gone, his father recently deceased, and the family farm foreclosed upon by the bank, Emmett's intention is to pick up his eight-year-old brother, Billy, and head to California where they can start their lives anew. But when the warden drives away, Emmett discovers that two friends from the work farm have hidden themselves in the trunk of the warden's car. Together, they have hatched an altogether different plan for Emmett's future, one that will take them all on a fateful journey in the opposite direction—to the City of New York. Spanning just ten days and told from multiple points of view, Towles's third novel will satisfy fans of his multi-layered literary styling while providing them an array of new and richly imagined settings, characters, and themes. “Once again, I was wowed by Towles's writing—especially because *The Lincoln Highway* is so different from *A Gentleman in Moscow* in terms of setting, plot, and themes. Towles is not a one-trick pony. Like all the best storytellers, he has range. He takes inspiration from famous hero's journeys, including *The Iliad*, *The Odyssey*, *Hamlet*, *Huckleberry Finn*, and *Of Mice and Men*. He seems to be saying that our personal journeys are never as linear or predictable as an interstate highway. But, he suggests, when something (or someone) tries to steer us off course, it is possible to take the wheel.” – Bill Gates

Good Health at Low Cost 25 Years on

The first book by New England Patriots quarterback Tom Brady--the five-time Super Bowl champion.

The Lincoln Highway

Public health officials and organizations around the world remain on high alert because of increasing concerns about the prospect of an influenza pandemic, which many experts believe to be inevitable. Moreover, recent problems with the availability and strain-specificity of vaccine for annual flu epidemics in some countries and the rise of pandemic strains of avian flu in disparate geographic regions have

alarmed experts about the world's ability to prevent or contain a human pandemic. The workshop summary, *The Threat of Pandemic Influenza: Are We Ready?* addresses these urgent concerns. The report describes what steps the United States and other countries have taken thus far to prepare for the next outbreak of "killer flu." It also looks at gaps in readiness, including hospitals' inability to absorb a surge of patients and many nations' incapacity to monitor and detect flu outbreaks. The report points to the need for international agreements to share flu vaccine and antiviral stockpiles to ensure that the 88 percent of nations that cannot manufacture or stockpile these products have access to them. It chronicles the toll of the H5N1 strain of avian flu currently circulating among poultry in many parts of Asia, which now accounts for the culling of millions of birds and the death of at least 50 persons. And it compares the costs of preparations with the costs of illness and death that could arise during an outbreak.

As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

The Threat of Pandemic Influenza

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The Disinformation Age

Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and "get tough" pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. *Juvenile Crime, Juvenile Justice* presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents—trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance—the probability that delinquency or criminal activities decrease with age—and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? *Juvenile Crime, Juvenile Justice* presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

Dr. Atkins' New Diet Revolution

In a brief, clear and easily accessible way, this summary illustrates the dynamics of the obesity epidemic and its impact on public health throughout the WHO European Region, particularly in eastern countries. It describes how factors that increase the risk of obesity are shaped in different settings, such as the family, school, community and workplace. It makes both ethical and economic arguments for accelerating action against obesity, and analyses effective programs and policies in different government sectors, such as education, health, agriculture and trade, urban planning and transport. The summary also describes how to design policies and programs to prevent obesity and how to monitor progress, and calls for specific action by stakeholders: not only government sectors but also the private sector - including food manufacturers, advertisers and traders - and professional consumers' and international and intergovernmental organizations such as the European Union.
