Shadows of the Moon

M. M. Kaye, author of *The Far Pavilions*, sweeps her readers back to the vast, glittering, sunbaked continent of India. *Shadow of the Moon* is the story of Winter de Ballesteros, a beautiful English heiress who has come to India to be married. It is also the tale of Captain Alex Randall, her escort and protector, who knows that Winter's husband to be has become a debauched wreck of a man. When India bursts into flaming hatreds and bitter bloodshed during the dark days of the Mutiny, Alex and Winter are thrown unwillingly together in the brutal and urgent struggle for survival.

Shadows on the Moon

Tells the story of the exciting and challenging years in space flight, with two superpowers engaged in a titanic struggle to land one of their own people on the moon. This book explores the inspirations, ambitions, personalities, and experiences of the select few whose driving ambition was to fly to the moon.

Shadow of the Moon

Once a fabled pirate garrison, the island of Ibiza gained its reputation as a countercultural hotbed of adventure seeking bohemian dropouts during the 20th century. Eventually this crossroads of experimental musicians, "hippie trail" travelers, and tourists looking to party turned Ibiza into the epicenter of electronic music that it is today. Pioneering electronic music DJs from around the world make the island their home over the summer season, attracting an equally international party community. Eco tourists and nature lovers seeking the particular pleasures of Ibiza also flock in annually, as do a crucial contingent of island faithfuls who return year after year to this tiny, charismatic, and insubordinate Mediterranean hub to live the Ibiza "experience" that goes way beyond the parties. With a foreword by Richie Hawtin, the world's leading electronic artist and DJ, *Shadows Across the Moon* explores the social and cultural history of Ibiza and its nocturnal playgrounds. It is the first and only book to cover the entire fascinating and unique history of dance and counterculture in Ibiza, and vividly describes the artists, sunset drummers, shamans, DJs, outlaws, psychedelic evangelists, politicians and hippie

organizers who gradually shaped the island's party landscape into the hugely influential nexus it is today.

Shadows of the Moon

From two of the greatest imaginations of our time comes a magnificent novel of adventure and magic...SHADOW MOON: First in the Chronicles of the Shadow War. The genius of Star Wars(r) creator George Lucas and the vision of Chris Claremont, the author of the phenomenally bestselling The Uncanny X-Men adventures, merge in what must be the fantasy event of the year. In Shadow Moon, war and chaos have gripped the land of Tir Asleen. An ancient prophecy reveals one hope: a savior princess who will ascend to the throne when the time is right. But first, a Nelwyn wanderer must face forces of unimaginable malevolence and dangerous, forbidden rites of necromancy that could bring back a powerful warrior from soulless sleep. George Lucas reshaped filmmaking in the '70s and '80s with his Star Wars and Indiana Jones films. When Bantam Books asked Lucas if he had any stories he would like to develop as novels rather than as films, Lucas turned to his 1988 fantasy film, Willow. "When I wrote the story for Willow, I began with the pre-story," Lucas said, "but the full story was yet to be told." Now, Lucas's vision is being fulfilled with the talented help of Chris Claremont. Having previously taken the reins of what was for a decade the bestselling comic in the western hemisphere (The Uncanny X-Men) Claremont assumes the responsibility of foster parent to Lucas's creation. On sale in hardcover now, and available on BDD Audio Cassette as well, SHADOW MOON is a momentous new adventure for readers looking to spend part of this summer in a fantastic world. SHADOW MOON is one of Bantam Spectra's most exciting publishing events in 1995, the year we celebrate our 10th Anniversary as the premiere publishing imprint of books of speculative fiction.

From an award-winning author, astronomer, and anthropologist, an exploration of the scientific and cultural significance of the mesmerizing cosmic display. Since the first humans looked up and saw the sun swallowed by darkness, our species has been captivated by solar eclipses. Astronomer and anthropologist Anthony Aveni explains the history and culture surrounding solar eclipses, from prehistoric Stonehenge to Babylonian creation myths, to a confirmation of Einstein's theory of general relativity, to a spectacle that left New York City in the moon's shadow, to future eclipses that will capture human imaginations. In one accessible and engaging read, Aveni explains the science behind the phenomenon, tracks eclipses across the ancient world, and examines the roles of solar eclipses in modern times to reveal the profound effects these cosmic events have had on human history. Colored by his own experiences—Aveni has witnessed eight total solar eclipses in his lifetime—his account of astronomy's most storied phenomenon will enthrall anyone who has looked up at the sky with wonder. "Aveni's authoritative but accessible text is the clearest statement of the way our perception of eclipses has changed over the centuries." —Stuart Clark, New Scientist "Authoritative and engaging." —Marcelo Gleiser, NPR's 13.7 "A recommended way to share the spirit of the occasion." —Laurence A. Marschall, Natural History magazine "Everything you need to enjoy a solar eclipse—and even predict one, just like the Babylonians did! Aveni's entertaining explorations show the very different impacts eclipses have had on past and present cultures." —David DeVorkin, National Air and Space Museum, Smithsonian Institution

Shadow Moon

"There's something eerie about the forest late at night, when the moon is your only source of light. Sounds feel intensified-every critter scurrying in the brush makes your heart lurch. I used to think that this would feel freeing, like being in the trees alone would feel as if I were the only person in the world. How naive of me. The forest has eyes lurking in the shadows that only the moon can see." Witches, Shadow Walkers, werewolves, and vampires roam the lands, but Dani's blood holds the cure to a deadly curse that could end a war... Or start a new one. Kol is the land's most dangerous Shadow Walker, but his decisions land him in trouble, and he must find Dani in exchange for his freedom. But when sworn enemies spark romance and the shadows emerge, both Dani and Kol are thrown into lives and worlds they could have never dreamed of.

Shadows in the Moonlight

In her first books, *Behaving as if the God in All Life Mattered*, Machaelle Small Wright wrote: "If we allowed all the knowledge from our soul level to fully flow and be totally accessible to our conscious self ... before we disciplined ourselves on how to respond to such as flow on the physical level, we would shatter. Blindly expressing limitless through limitation would be more pressure than our body could bear." In *Behaving*, Machaelle scratched the surface on a whole new reality. Now, in *Dancing*, she opens the door and invites us in. Out to discredit the "Ozzie and Harriet" School of Spirituality, Machaelle gives us extensive groundwork, supported by an actual account of her own expansion experience. She tells of her introduction to the White Brotherhood - that evolved group of souls who assist humans in their evolutionary development - in a story told through journal entries for those early years of her nature work. Reading *Dancing*, you feel like a bird on Machaelle's shoulder ... watching the expansion unfold.

An exhilarating dive into the secret history of humankind's race to the moon, from acclaimed author Amy Cherrix. This fascinating and immersive read is perfect for fans of Steve Sheinkin's *Bomb* and M. T. Anderson's *Symphony for the City of the Dead*. You've heard of the space race, but do you know the whole story? The most ambitious race humankind has ever undertaken was masterminded in the shadows by two engineers on opposite sides of the Cold War—Wernher von Braun, a former Nazi officer living in the US, and Sergei Korolev, a Russian rocket designer once jailed for crimes against his country—and your textbooks probably never told you. Von Braun became an American hero, recognized the world over, while Korolev toiled in obscurity. These two brilliant rocketeers never met, but together they shaped the science of spaceflight and redefined modern warfare. From Stalin's brutal Gulag prisons and Hitler's concentration camps to Cape Canaveral and beyond, their simultaneous quests pushed science—and human ingenuity—to the breaking point. From Amy Cherrix comes the extraordinary hidden story of the space race and the bitter rivalry that launched humankind to the moon.

In the Shadow of the Moon

A unique blend of traditional folklore and contemporary customs brings the Chinese Mid-Autumn Festival to life. Two sisters and their grandmother celebrate a popular Chinese holiday with family. Their favorite part? Mooncakes, of course--along with Ah-ma's story of the ancient Chinese tale of Hou Yi, a brave young archer, and his wife, Chang'E. A long, long time ago, Hou Yi rescued the earth from the heat of ten suns. The Immortals rewarded him with a magic potion that could let him live in the sky with them forever. But when a thief tries to steal the potion, what will Chang'E do to keep it out of dangerous hands? The sisters are mesmerized by Ah-ma's retelling and the fact that the very mooncakes they enjoy each holiday are a symbol of this legend's bravest soul.

You'll learn how events in our lives are seeded at eclipses and develop into predictable, interlinking moon phases. You'll discover the predictive power of moon phases and eclipses.

Dancing in the Shadows of the Moon

"Iron Shadows in The Moon," later known as "Shadows in the Moonlight," is one of the original short stories about the fictional sword and sorcery hero Conan the Cimmerian, written by American author Robert E. Howard. The story is set in the pseudo-historical Hyborian Age and depicts Conan escaping to a remote island in the Vilayet Sea, where he encounters the Red Brotherhood, a skulking creature, and mysterious iron statues.

In the Shadow of the Moon

Edited by Florence Derieux. Text by Amy Granat, Matt Keegan, Josh Smith, Fracois Quintin.

Moon Shadows

Fatima Bhutto's stunning fiction debut begins and ends one rainswept Friday morning in Mir Ali, a small town in the troubled tribal region of Waziristan. Three brothers meet for breakfast. Soon after, the eldest, recently returned from America, hails a taxi to the local mosque. The second brother, a doctor, goes to check in at his hospital. His troubled wife does not join the family that morning for no one knows where Mina goes these days. And the youngest, the idealist, leaves for town on a motorbike. Seated behind him is a beautiful, fragile girl whose world has been overwhelmed by war. Three hours later, their day will end in devastating circumstances. Beautifully written, full of emotion and heartbreak, *The Shadow of the Crescent Moon* is an extraordinary novel.

Iron Shadows in the Moon

Vast legions of gods, mages, humans, dragons and all manner of creatures play out the fate of the Malazan Empire in this first book in a major epic fantasy series from Steven Erikson. The Malazan Empire simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long inured to the bloodshed, yearn for some respite. Yet Empress Laseen's rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Conceived and written on a panoramic scale, Gardens of the Moon is epic fantasy of the highest order--an enthralling adventure by an outstanding new voice. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Twelve Kingdoms - Paperback Edition Volume 1: Sea of Shadow

This early work by Robert E. Howard was originally published in 1934 and we are now republishing it with a brand new introductory biography. 'Shadows in the Moonlight' is a story in the Conan series about his escape to a remote island of mystery. Robert Ervin Howard was born in Peaster, Texas in 1906. During his youth, his family moved between a variety of Texan boomtowns, and Howard - a bookish and somewhat introverted child - was steeped in the violent myths and legends of the Old South. At fifteen Howard began to read the pulp magazines of the day, and to write more seriously. The December 1922 issue of his high school newspaper featured two of his stories, 'Golden Hope Christmas' and 'West is West'. In 1924 he sold his first piece - a short caveman tale titled 'Spear and Fang' - for \$16 to the not-yet-famous Weird Tales magazine. Howard's most famous character, Conan the Cimmerian, was a barbarian-turned-King during the Hyborian Age, a mythical period of some 12,000 years ago. Conan featured in seventeen Weird Tales stories between 1933 and 1936 which is why Howard is now regarded as having spawned the 'sword and sorcery' genre. The Conan stories have since been adapted many times, most famously in the series of films starring Arnold Schwarzenegger.

One of the BBC's '100 Novels that Shaped the World' The Far Pavilions is the story of an English man - Ashton Pelham-Martyn - brought up as a Hindu. It is the story of his passionate, but dangerous love for Juli, an Indian princess. It is the story of divided loyalties, of friendship that endures till death, of high adventure and of the clash between East and West. To the burning plains and snow-capped mountains of this great, humming continent, M.M. Kaye brings her exceptional gifts of storytelling and meticulous historical accuracy, plus her insight into the human heart. Welcome Stephen Wolfram

How powerful are Wolfram's tools?

What is it like to be the weather?

Computationally bounded observers like us

Are all possible mathematical outcome out there somewhere?

Where is the Wolfram software at today?

Heisenberg, Bohr, and Einstein thought space was discreet

When we look back at Einstein's field equations it become obvious

Is the an early primordial node in the Ruliad?

Is the universe only three dimensional for observer like us?

How big is the elementary length?

What happens to black holes in the model?

Is it Everett's and the many worlds approach to Quantum Mechanics?

How do you think about GD6 in the multi way graph?

How does time dilation work in Wolfram's models?

What is the ultimate goal?

The bridge to string theory

Message d'une sage femme pour une naissance libre

"J'espère que vous allez laisser les histoires, c'est à dire la vie, vous arriver, que vous allez travailler avec ces histoires issues de votre existence -la votre, pas celle de quelqu'un d'autre- les arroser de votre sang, de vos larmes, [de votre lait] et de votre rire, jusqu'à ce qu'elles fleurissent et que vous fleurissiez pleinement à votre tour. C'est là la tâche, l'unique tâche." "Les larmes sont une rivière qui conduit quelque part. Elles entourent de leur flot le bateau qui emporte la vie de notre âme, viennent le soulever et l'entraîner hors des rochers, hors du terrain sec, vers un lieu nouveau, un endroit meilleur." - Clarissa Pinkola Estès, Femmes qui courent avec les loups - Ce livre ne contient aucun enseignement. Laissez vous porter par ses pages. Dans la tempête intérieure qui nous anime parfois, les tranches de vies ici rassemblées peuvent être votre phare, celui qui vous rappelle que vous êtes au bon endroit au

bon moment, que ce que vous faites est parfaitement juste. Laissez votre rivière couler, ne la retenez pas. Mais surtout, suivez son cours, et apprenez à nager avec elle, ainsi vous commencerez le plus beau des voyages : celui de la rencontre de soi.

" Toutes les sages-femmes de ma génération ont véritablement accompagné le travail, l'enfantement. Nous vivions et nous respirions avec les femmes, on peut même dire que nous accouchions avec elles [...]. Entre [nous] a toujours existé la complicité des regards et des silences. Des corps en accord. " Des accouchements, Margot Thieux en a pratiqué et elle sait en parler avec chaleur et compétence. Sa vocation naît au début des années cinquante, alors que la contraception et l'accouchement sans douleur entrent à peine dans les mœurs. Plaidant pour que les progrès techniques et médicaux soient mis au service du confort des femmes et de leurs proches, elle prône aujourd'hui la généralisation de l'hospitalisation à domicile : une solution d'avenir si elle passe par la mise en place d'un réseau ouvert aux familles et mettant en contact les sages-femmes, les médecins et les services de maternité.

Attendre un enfant et accoucher

A partir de l'histoire personnelle de l'auteur et de son parcours de sage-femme se dessine l'histoire globale de la Naissance dans ces cinquante dernières années en France. Quelle place, quelle évolution, quelle éthique, quelles avancées ? ARGUMENTAIRE

Quelle naissance aujourd'hui pour quelle société demain ?

Questo libro affianca conoscenze scientifiche e consigli pratici per aiutare ogni donna ad appropriarsi del proprio corpo e a vivere in pienezza la propria femminilità. Vengono descritti, in modo semplice e illustrato, tutti i meccanismi specifici del corpo femminile, dalla pubertà alla menopausa: il ciclo, la fertilità, la sessualità, la gravidanza, il parto. Un itinerario appassionante per le donne (e non solo!) di ogni età: per le ragazze adolescenti alla scoperta del loro corpo e della sessualità, per le donne in età fertile e per quelle che si avvicinano alla menopausa.

Au coeur de la naissance

Sage-femme, quel beau métier ! Pourtant, celui-ci a bien changé depuis ses origines. De savoir-faire reposant sur l'expérience, l'art de la sage-femme s'est mué en pratique soumise à la science obstétricale et à ses techniques interventionnistes. Pour le meilleur comme pour le pire. Dans ce livre, Joëlle Terrien nous invite à explorer l'Histoire mais aussi le présent, pour tenter de comprendre le processus d'hyper-médicalisation de la naissance. Mais si elle dénonce la " pathologisation " d'une compétence féminine fondamentale, Joëlle n'en renonce pas pour autant à la rigueur scientifique. A l'investigation historique et à l'analyse sociologique vient alors s'ajouter une réflexion sur la physiologie de la naissance, qui considère le corps vivant et en mouvement libre. La genèse du placenta, l'hémodilution et l'anémie, le diabète gestationnel et le "gros bébé \

Passage de vies

Ce livre apporte des connaissances scientifiques et des conseils pratiques pour aider chaque femme à s'approprier son corps et à vivre pleinement sa féminité, quelles que soient les "saisons" de son cycle et de sa vie. De la puberté à la ménopause, tous les mécanismes spécifiques au corps féminin sont expliqués de façon simple et imagée : le cycle, la fertilité, la sexualité, la grossesse, l'accouchement. De nombreuses pistes sont données pour vivre au naturel et démedicaliser son rapport au corps. Un itinéraire passionnant qui donne envie de déployer toutes les potentialités du corps féminin !

Chroniques d'un authentique voyage au coeur de la grossesse et de l'accouchement En te présentant en siège, tu nous montres déjà ta prise de décision, ton intention, ton programme. Tu nous montres que se positionner dans la vie et assumer ses choix est important. Tu nous montres qu'il faut poser ses limites et se respecter. Je te remercie pour ta présence et ta posture, et pour tout ce que tu m'as apporté

durant cette grossesse. Tu as déjà tellement fait. Tu es un rayon de soleil, une étoile, une lumière. Je te remercie car j'étais à la recherche d'authenticité, et je pense que c'est seulement grâce à toi que je vais découvrir réellement ce que cela signifie, et que ma vraie mission de vie va éclore. Dire que tu es là, en moi, et que je vais très bientôt te rencontrer, en personne... C'est presque inimaginable pour moi, incroyable.

Je suis enceinte et ça me plaît

Ce livre revient sur l'origine de cette tendance éducative (en opposition avec le maternage distal) et explique de manière détaillée chaque pratique et ses bienfaits pour les besoins de l'enfant sans omettre de mentionner les éventuelles limites. Truffé de conseils pratiques et de témoignages, ce livre invite également les pères, parfois mis à distance, à prendre leur place dans cet accompagnement parental. Dans ce guide très complet, vous trouverez toutes les infos sur : une grossesse en pleine conscience, l'accouchement et la contenance du bébé, le portage, l'alimentation, le sommeil et l'hygiène de l'enfant, l'attachement et la sécurité affective, les questionnements autour de la parentalité proximale, les bonnes conditions pour mettre en place le maternage proximal. Mais aussi un focus sur comment mettre en place le maternage proximal lorsqu'il y a plusieurs enfants dans la famille ou sur le cas particulier des jumeaux. Charlotte Lardery est sage-femme. Elle consulte à Lyon et intervient dans des écoles de sages-femmes ainsi que des collectifs de parents en tant que formatrice en maternage proximal. Adrian Serban est pédiatre. Il a réalisé une étude auprès de jeunes enfants sur leur style d'attachement en collaboration avec la Faculté de Munich et tenu plusieurs conférences à ce sujet, en France et en Allemagne.

Quels sont les fondements d'une enfance heureuse? Pour y répondre, les auteurs ont interviewé sur deux continents des éducateurs, des parents, des spécialistes de la santé physique et mentale, des enfants et des personnes venues témoigner de leur enfance et de l'impact qu'elle a eue sur toute leur vie. L'occasion de faire un grand bilan sur les droits des enfants, et les devoirs des adultes et de la société à leur égard. Avec des collaborations, entre autres, de: Boris Cyrulnik, Kim Thuy, Jean-Marie Lapointe, Michel Odent, Josée Blanchette, Arlette Cousture, Camil Bouchard, Gilles Julien, Claire Pimparé, Richard Poulin, Zlata Filipovic, Isabelle Brabant, Lorraine Fillion, Yvon Gauthier, Michel Lemay, Marcel Ruffo et Benoît Lacroix.

Une enfance pour la vie

"Des femmes écrivent l'Afrique" est un projet de reconstruction culturelle qui se propose de donner à entendre de par le monde des voix de femmes africaines, pour la plupart méconnues. Ce projet de longue haleine a abouti à la publication en anglais, par la Feminist Press, à New York, de quatre anthologies régionales. Le présent ouvrage, consacré à L'Afrique de l'Est, constitue le troisième volume de la série que les Editions Karthala, à Paris, publient à leur tour en traduction française. Cette anthologie comprend plus d'une centaine de textes, parfois fort anciens (le premier datant de 1711), précédés chacun d'une note introductive. Les cinq pays représentés - le Kenya, le Malawi, l'Ouganda, la Tanzanie et la Zambie - accédèrent à leur indépendance dans les années 1960. Comme en témoignent les propos d'activistes et de parlementaires, les femmes participèrent aux mouvements de résistance et au processus de développement de leurs pays. Parmi les morceaux choisis de ce volume, certains présentent un intérêt historique certain, tels que deux textes rares d'anciennes femmes esclaves ; une lettre rédigée en 1711 par une femme qui dirigea un vaste domaine musulman ; un poème épique musulman datant de la moitié du XIXe siècle, nouvellement traduit en anglais ; un hymne chrétien datant de 1890 ; les mémoires d'une Maréchale de guerre Mau Mau. Le volume se termine par le discours de réception du Prix Nobel de la Paix de Wangari Maathai, la première environnementaliste et la première femme africaine à avoir obtenu cette récompense. Si le kiswahili demeure, à côté de l'anglais, la langue dominante de la sous-région, trente et une autres langues est-africaines sont représentées dans l'ouvrage. La maternité, l'éducation, la religion, la participation au monde du travail, les droits des veuves, la prostitution, la polygamie, la circoncision, la rébellion et le SIDA constituent les thèmes essentiels traités dans les extraits de romans, les poèmes, les lettres, les articles de journaux, les récits oraux, les discours et les documents historiques retenus, couvrant une période de trois siècles.

Les déformations crâniennes positionnelles (DCP) du nourrisson – « tête plate » dans le langage courant – concernent un nombre très conséquent d'enfants. Elles sont source d'inquiétude pour les parents alors qu'elles pourraient être évitées grâce à un diagnostic et une prise en charge précoces. De nombreux dogmes et croyances sur ces DCP sont répandus parmi les professionnels de santé, pouvant mener à des erreurs diagnostiques et des retards de prise en charge. Dans ce contexte, cet ouvrage constitue une base solide de connaissances théoriques et pratiques qui permet une prise en charge efficace et harmonisée des enfants concernés. Son objectif est de réunir des données fiables, récentes et consensuelles sur les DCP du nourrisson. Dans la première partie, les aspects théoriques sont abordés, notamment les causes, les facteurs de risque, l'épidémiologie ou encore les conséquences des DCP. Dans les parties suivantes, des notions pratiques concernant les éléments diagnostiques et cliniques, ainsi que la prise en charge sont détaillées. Près de 150 photos et dessins accompagnent le texte. L'originalité et la force de ce livre résident dans son aspect pluridisciplinaire : 22 professionnels représentant 12 disciplines différentes ont co-écrit cet ouvrage, en s'appuyant à la fois sur leur expérience pratique et sur les récentes données scientifiques internationales sur le sujet. L'enjeu est avant tout une réflexion commune et cohérente entre professionnels, qu'il s'agisse du bilan diagnostique, de la prévention ou de l'orientation thérapeutique. Cet ouvrage s'adresse à tous les professionnels médicaux et paramédicaux travaillant avec des nourrissons ou de jeunes enfants (médecin, pédiatre, sage-femme, infirmière et auxiliaire puéricultrice, kinésithérapeute, ostéopathe, psychomotricien, chiropracteur, etc.), mais aussi aux parents s'intéressant à ce sujet.

Cet essai est le récit d'une quête psycho-spirituelle. Ulyssia et Pénélope, deux amies thérapeutes, échangent à propos de l'Inconscient, pendant une année. Ulyssia s'appuie sur sa vie, ses amours, ses connaissances en interprétation des rêves, en thérapie florale du Dr Bach et autres approches... Pénélope explore l'apport des dessins projectifs. Cela permet à Ulyssia de libérer sa créativité, d'intégrer son ombre et sa lumière, ainsi que son partenaire masculin intérieur. Ce livre est un guide qui conviendra à tous ceux qui s'intéressent aux sciences de l'esprit, sans connaissances spécifiques préalables. Il aide à répondre à la question que tout un chacun se pose, à savoir, "qui suis-je ?"

The Nature of Birth and Breastfeeding has as its premise that in order to gain a truer understanding of the human experience, we must examine the way other mammals function during birth, breastfeeding, and parenting. Odent points out some customary procedures that becloud the approaches to childbirth in Western society. On the one hand, privacy and minimal intervention are key to the ideal birth environment, yet hospitals and the advent of high-tech obstetrics often dictate the opposite, with a result of higher cesarean and morbidity rates. Odent uncovers another irony - the proven need of mother and infant to receive support for an extensive period of breastfeeding may actually be endangered by the nuclear monogamous family structure.
