Fighting for Honor

A groundbreaking investigation into the migration of martial arts techniques across continents and centuries The presence of African influence and tradition in the Americas has long been recognized in art, music, language, agriculture, and religion. T. J. Desch-Obi explores another cultural continuity that is as old as eighteenth-century slave settlements in South America and as contemporary as hip-hop culture. In this thorough survey of the history of African martial arts techniques, Desch-Obi maps the translation of numerous physical combat techniques across three continents and several centuries to illustrate how these practices evolved over time and are still recognizable in American culture today. Some of these art traditions were part of African military training while others were for self-defense and spiritual discipline. Grounded in historical and cultural anthropological methodologies, Desch-Obi's investigation traces the influence of well-delineated African traditions on long-observed but misunderstood African and African American cultural activities in North America, Brazil, and

the Caribbean. He links the Brazilian martial art capoeira to reports of slave activities recorded in colonial and antebellum North America. Likewise Desch-Obi connects images of the kalenda African stick-fighting techniques to the Haitian Revolution. Throughout the study Desch-Obi examines the ties between physical mastery of these arts and changing perceptions of honor. Including forty-five illustrations, this rich history of the arrival and dissemination of African martial arts in the Atlantic world offers a new vantage for furthering our understanding of the powerful influence of enslaved populations on our collective social history.

Deconstructing Martial Arts

What is the essence of martial arts? What is their place in or relationship with culture and society? Deconstructing Martial Arts analyses familiar issues and debates that arise in scholarly, practitioner and popular cultural discussions and treatments of martial arts and argues that martial arts are dynamic and variable constructs whose meanings and values regularly shift, mutate and transform, depending on the context. It argues that deconstructing martial arts is an invaluable approach to both the scholarly study of martial arts in culture and society and also to wider understandings of what and why martial arts are. Placing martial arts in relation to core questions and concerns of media and cultural studies around identity, value, orientalism, and embodiment, Deconstructing Martial Arts introduces and elaborates deconstruction as a rewarding method of cultural studies.

Twelve Years a Slave

Now a major motion picture nominated for nine Academy Awards. Karate-Do

Linking the time when karate was a strictly Okinawan art of self-defense shrouded in the deepest secrecy and the present day, when it has become a martial art practiced throughout the world, is Gichin Funakoshi, the "Father of Karate-do." Out of modesty, he was reluctant to write this autobiography and did not do so until he was nearly ninety years of age. Trained in the Confucian classics, he was a schoolteacher early in life, but after decades of study under the foremost masters, he gave up his livelihood to devote the rest of his life to the propagation of the Way of Karate. Under his guidance, techniques and nomenclature were refined and modernized, the spiritual essence was brought to the fore, and karate evolved into a true martial art. Various forms of empty-hand techniques have been practiced in Okinawa for centuries, but due to the lack of historical records, fancy often masquerades as fact. In telling of his own famous teachers--and not only of their mastery of technique but of the way they acted in critical situations--the author reveals what true karate is. The stories he tells about himself are no less instructive: his determination to continue the art, after having started it to improve his health; his perseverance in the face of difficulties, even of poverty; his strict observance of the way of life of the samurai; and the spirit of self-reliance that he carried into an old age kept healthy by his practice of Karate-do.

Sport for Development and Peace

This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. The role of sport in development initiatives has grown dramatically over the last five years, now finding a place in the UN's millennium development goals. In *Sport and Development for Peace*, Simon Darnell outlines the most recent sociological research on the role of sport in development initiatives. The book analyses the relationship between sport and international development and looks at what this reveals about socio-political economy. It addresses a gap in the literature by focusing on issues of politics, power and culture, particularly looking at volunteer experience, mega-sporting events and sporting celebrity in the context of development. Darnell questions the belief that sport can offer a 'solution' to enduring development issues. Drawing on the latest empirical research, the book is a thorough and timely analysis of the social and political implications of tying sport to development.

Colette's Republic

In France's Third Republic, secularism was, for its adherents, a new faith, a civic religion founded on a rabid belief in progress and the Enlightenment conviction that men (and women) could remake their world. And yet with all of its pragmatic smoothing over of the supernatural edges of Catholicism, the Third Republic engendered its own fantastical ways of seeing by embracing observation, corporeal dynamism, and imaginative introspection. How these republican ideals and the new national education system of the 1870s and 80s - the structure meant to impart these ideals - shaped belle époque popular culture is the focus of this book. The author reassesses the meaning of secularization and offers a cultural history of this period by way of an interrogation of several fraught episodes which, although seemingly disconnected, shared an attachment to the potent moral and aesthetic directives of French republicanism: a village's battle to secularize its schools, a scandalous novel, a vaudeville hit featuring a nude celebrity, and a craze for female boxing. Beginning with the writer and performer Colette (1873-1954) as a point of entry, this re-evaluation of belle époque popular culture probes the startling connections between republican values of labor and physical health on the one hand, and the cultural innovations of the decades preceding World War I on the other.

Intimate Ironies

Focusing on the period between 1920 and 1950, the author looks beyond ideologies to reveal how middle-class men and women strained to wrest order from the ordeal of change.

River of Fire, River of Water

With great spiritual insight and unparalleled scholarship, Dr. Taitetsu Unno—the foremost authority in the United States on Shin or Pure Land Buddhism—introduces us to the most popular form of Buddhism in Japan. Unique among the various practices of Buddhism, this "new" form of spiritual practice is certain to enrich the growing practice of Buddhism in the United States, which is already quite familiar with Zen and Tibetan traditions. River of Fire, River of Water is an introduction to the practice of Pure Land Buddhism for readers with or without prior experience with it. The Pure Land tradition dates back to the sixth century c.e., when Buddhism was first introduced in Japan. Unlike Zen, its counterpart which flourished in remote monasteries, the Pure Land tradition was the form of Buddhism practiced by common people. Consequently, its practice is harmonious with the workings of daily life, making it easily adaptable for seekers today. Despite the difference in method, though, the goal of Pure Land is the same as other schools—the awakening of the true self. Certain to take its place alongside great works such as Three Pillars of Zen, The Miracle of Mindfulness, and Zen Mind, Beginner's Mind—River of Fire, River of Water is an important step forward for American Buddhism.

Tao of Zen

The premise of The Tao of Zen is that Zen is really Taoism in the disguise of Buddhism—an assumption being made by more and more Zen scholars. This is the first Zen book that links the long-noted philosophical similarities of Taoism and Zen. The author traces the evolution of Ch'an. The Tao of Zen is a fascinating book that will be read and discussed by anyone interested in both Taoism and Zen.

Existence

The mystery of existence and our place in that mystery--as expressed in a single Chinese landscape painting: a new work of meditative philosophy by the renowned translator of the Chinese classics and author of Hunger Mountain. Join David Hinton, the premier modern translator of the Chinese classics, as he stands before a single landscape painting, discovering in it the wondrous story of existence—and as part of that story, the magical nature of consciousness. What he coaxes from the image is nothing less than a revelation: the dynamic interweaving of mind and Cosmos, and the glorious dance of Absence and Presence that is the secret of that Cosmos. The painting called Peaceful-Distance Pavilion by Shih-t'ao (1642-1707) is, like other paintings in that genre, mostly space: one tiny figure, accompanied by an attendant, looks out over a vast landscape of mountains and clouds. But start looking into that space and, with the right guidance, what you end up seeing is profound. David Hinton is the perfect guide. He uses his knowledge of Chinese philosophy, poetry, art, language, and writing system to illuminate this painting's message, which is ultimately the story of the glorious dance between nothing and everything, between emptiness and existence. It's an enthralling journey that can change the way you look at the world, a journey for which David is a wise and eloquent guide.
