The Birds of Ohio

Excerpt from The Birds of Ohio: A Complete, Scientific and Popular Description of the 320 Species of Birds Found in the State The summaries under the caption General Range are chiefly those furnished by the Second Edition of the A. O. U. Check - list. Modified by such more recent information as has come to hand. While the author's point of view has been that of a bird-lover, some things here recorded may seem inconsistent with the claim of that title. The fact is that none of us are quite consistent in our attitude toward the bird world. The interests of sport and the interests of Science must sometimes come into conflict with those of sentiment; and if one confesses allegiance to all three at once he will inevitably appear to the partisans of either in a bad light. However, a real principal of unity is found when we come to regard the bird's value to society. The question then becomes. Not, IS this bird worth more to me in my collection-or upon my plate than as a living actor in the drama of life? But, In what capacity can this bird best serve the interests of mankind? There can be no doubt that the answer to the latter question is usually and increasingly, As a living bird. We have stuffed specimens enough, nearly; only a limited few of us are fitted to enjoy the pleasures of the chase. And the objects of our passion are about gone anyway; but never while the hearts of men are set on peace. And the minds of men are alert to receive the impression of the Infinite, will there be too many birds to speak to eye and ear. And to minister to the hidden things of the spirit. The Birds of Ohio; a Complete Scientific and Popular Description of the 320 Species of Birds Found in the State Volume 1

Excerpt from The Birds of Ohio: A Revised Catalogue Keenly feeling the need for a state catalogue of our birds which should embody the latest results of field work and, conform to the adopted system of nomenclature, the writer appealed to the Ohio State Academy of Science, at its meet ing in December, 1900, and found ready sympathy in the plan for a revision. A liberal portion of the mcmillin fund was placed at his disposal for the purpose of prosecuting the work, and it is largely that substantial help which makes it possible to present the finished report at this early date. With this fund it was possible to mail upward of two hun dred lists of birds of probable occurrence to different parts of the state for reports from local bird students, and to visit several little known regions of the state for the purpose of studying the bird fauna there at first hand. A list of those who kindly contributed notes and who gave other assistance will be found elsewhere. The nomenclature adopted in this Catalogue conforms to that of the American Ornithologists' Union Check - List, Sec ond Edition and Supplements succeeding. While this sys tem is not free from faults, and while another revision seems imminent, it is not within the province of this catalogue to anticipate much of such revision. Some. Questions relating to the validity of species and subspecies which occur in Ohio await settlement. In these few cases I have been obliged to use my best judgment respecting the questions at issue. If that judgment proves unsound I trust that the reader will consider the limitations of time and material under which I am obliged to complete this work. The story of the Kirtland's warbler is a story of complex relationships between the bird and its environment, the humans who interact with it, and the complex government policies that affect it.
