This book is designed for parents who want to help their children and for teachers who wish to prepare their class for the NAPLAN Tests. NAPLAN Tests are sat by Year 5 students Australia-wide. These tests are held in May every year. The tests are in literacy and numeracy. In literacy there are three tests: Language Conventions - %spelling, grammar and punctuation: there are around 50 questions in this test Reading - %comprehension: there are around 35 questions in this test Writing% - written expression: there is one piece of writing in this test In the numeracy test mathematics is tested. There are 40 questions in this test. Parents may also use these books separately from the tests and just as a general way of revising or when tutoring their children. This book is divided into sample questions and practice tests. It starts with samples of the literacy (Reading and Language Conventions) and numeracy questions. This is then followed by four practice tests for numeracy, four practice tests for reading and four practice tests for language conventions. There is a sample writing task and four practice writing tasks. Samples can be revised if the practice tests are not completed. * This is not an officially endorsed publication of the NAPLAN program and is produced by Pascal Press independently of Australian governments.

The Psychology of Special Abilities and Disabilities

Can aural training in music enhance your sound-discrimination abilities for languages? The study sets off to answer this question by testing 50 German-speaking students of non-linguistic degrees for their abilities to discriminate between sounds in Finnish, a language previously entirely unknown to them. 25 randomly selected subjects then went through an aural training in music for two weeks before all the subjects were retested in their aural-perceptive abilities in the Finnish language by means of a similar test containing different test items. The hypothesised positive effect of the musical intervention could be partially proved by a statistically significant mean enhancement in the final scores achieved by the trained group compared to an insignificant enhancement achieved by the control group.
